DIPOLE ELECTRON FLOOD THEORY

SOLVES 100% OF MATERIAL INTERACTIONS

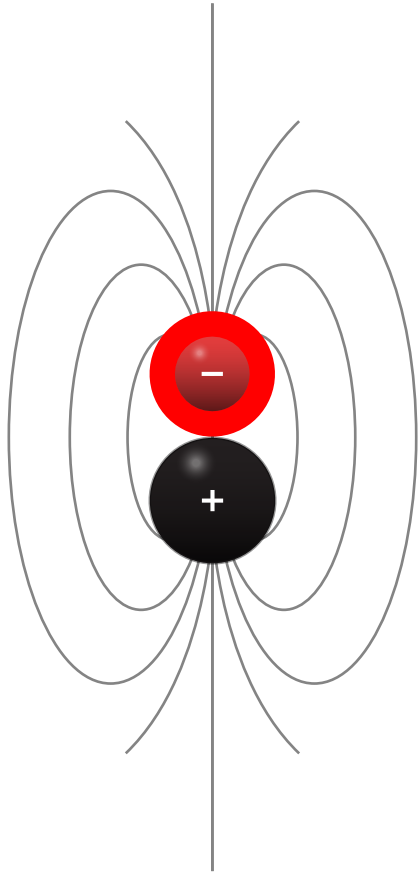

ELECTRONS

Dipole Light Particles

Comprised of a Positive “Muon” & Negative “Electron” Together.

The magnetic **DIPOLE** aspect of the theory

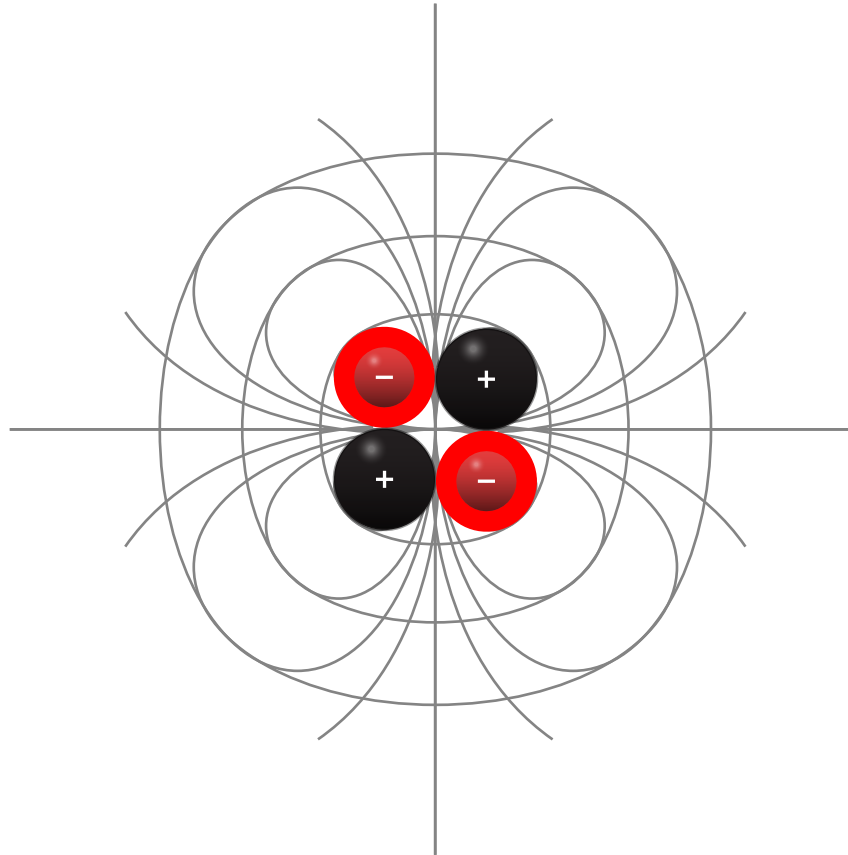

Also known as a **GLUON** in physics

THE PHOTON

Anatomy of the photon

Comprised of 2 light particles together

THE PROTON

1823 Electrons

Together surrounding a central positive core
